## Notice of Annual School Meeting.

Agreeable to section 2, article 1, Grand Rapids City Charter pertaining to schools, notice is hereby given that the annual school meeting of Grand Rapids district 1, to elect commissioners and to transact such general business as may legally come before it, will be held at the Howe school building, situated in the second ward of the city of Grand Rapids, Monday March 20, 1911, at 7:00 o'clock P. M.

Commissioners to be elected as follows:

First Ward—Commissioner to succeed W. H. Reeves whose term expires April 8, 1911.

Second Ward—Commissioner to succeed T. W. Brazee whose term expires April 8, 1911.

Third Ward—Commissioner to succeed W. F. Kellogg whose term expires April 8, 1911.

Fourth Ward—Commissioner to succeed G. O. Babcock whose term expires April 8, 1911.

Fifth Ward—Commissioner to succeed Otto Hein whose term expires April 8, 1911.

Sixth Ward—Commissioner to succeed E. Oberbeck whose term expires April 8, 1911.

Seventh Ward—Commissioner to succeed C. A. Hatoh whose term expires April 8, 1911.

Eighth Ward—Commissioner to succeed J. W. Natwick whose term expires April 8, 1911.

C. W. Schwede,  
Clerk of the Board of Education,  
March 1, 1911.

It will not be convenient to hold the annual meeting in the Howe Building owing to the fact that the assembly room has been divided into recreation rooms.

The meeting will be adjourned to meet at the Lincoln Building the same evening, Monday March 20, 1911, 7:00 P. M. Citizens are requested to come directly to the Lincoln Building for the annual school meeting.

It will be necessary to call the meeting as stated above in order to meet the provisions of the City Charter.

C. W. Schwede,  
Clerk of the Board of Education,  
March 1, 1911.

## What They Think of Rouse.

J. D. Rouse of Amherst, who is a candidate for the office of County Superintendent of Schools, has some strong recommendations from people who he formerly lived and taught school. One of these is as follows:

Mr. J. D. Rouse is well known in this county as an educator. He has filled some very important places, and his work has been very satisfactory.

I have always found him to be a perfect gentleman, and from my own personal observation I know him to be a strong teacher and worthy of any trust placed in his charge.

L. A. Williams,  
Supt. of Schools, Walworth Co.

## Junior Civic League.

The Junior Civic League was organized two years ago in the public schools. It was organized because we believe that the children are as important a factor in making our city more beautiful as are the older people.

It is a league for the training of all school children in the principles of laws, order, cleanliness and beauty.

The pledge reads as follows, I promise to try not to destroy any tree, shrub or lawn. Not to deface any fence or public building. Not to spit upon the sidewalks or floors of any street car or building. To keep the back yard as clean as the front, etc.

We will ask the children to sign this pledge but no dues will be charged for joining the league this year.

The members will have an opportunity of buying flower and vegetable seeds at a penny a package, no child buying more than five packages. The grades to which these flower seeds will be sold will be from the third to the seventh inclusive. Each child is to care for his own little plot of flowers or vegetables and dispose of the flowers and vegetables as he sees fit.

The flowers can be sent either directly or thru the committee to the hospital or sold and the vegetables can be sold or so make possible the starting of little bank accounts from the profits derived from the garden produce.

We expect to have a flower and vegetable exhibit in the fall and prizes will be awarded at that time. Schools in all parts of the country are doing this work either in a small or large way and very enthusiastic reports are given of the results.

We are beginning this phase of the Junior Civic League work in a small way but we hope that the work will enlarge each year and that the children will learn to observe and love the laws of nature, kindness to animals, respect for other's property, order, industry, perseverance, courage and patriotism, and the problems attending to Civic League work now will have vanished when our children attain to manhood and womanhood.

## REPRESENTED WATER POWER OWNERS.

Attorney T. W. Brazee of this city was in Madison on Thursday where he represented the side of the water powers before the legislature as a Committee of the whole, in a discussion of the water power control question. In speaking of the matter a correspondent for the Milwaukee News says:

The principal point made by Mr. Brazee was that the owners of existing water power franchises considered that they had voted rights under them which could not be taken away that both the proposed regulation of the Hunting bill and the state ownership proposed in the Claydon bill contravened the constitution. A query as to whether the control or ownership of the water powers could not be attained through a constitutional amendment was met by Mr. Brazee with the answer that even a state constitutional amendment would not permit the taking of property without due process of law. Senator Claydon asked if the principal objection of Mr. Brazee to his bill was not that it was a Socialistic measure and that its adoption meant Socialism. Mr. Brazee admitted that this was one of the objections to the bill. The former state senator also spoke of the development of the state which has followed the development of the waterpowers and the development of such places as Nekeema with the resultant benefit to the state both in increasing their assessed valuation and in the establishment of prosperous communities.

Mr. Brazee intimated that the water power owners would be perfectly willing that their position should be fought out in the courts should either the Hunting or the Claydon bills be enacted into law. The evening session of the committee was occupied by a discussion, by former Assemblyman Wm. M. Bray of Oshkosh, of the waterpower control bill which received the endorsement of a majority of the members of the special legislative committee of the legislature of 1909 appointed to investigate the question but which was never presented to this legislature, no member having been willing to introduce the bill.

## Probably Only a Rumor.

There is a well defined rumor in rural circles that within a short time the various railroads will announce the abandonment of all Sunday passenger trains. It is claimed this will be in line with the recent retrenchment orders of the roads, especially of the St. Paul lines, claimed to have been made necessary by recent adverse legislation. The reports could not be verified here, although several employees of the St. Paul admitted having heard of the proposed change. It is scarcely possible that either the St. Paul or North Western will abandon all Sunday trains in the northern part of the state because of the great amount of revenue which they bring during the summer and fall hunting seasons—Merrill News.

While the above rumor may be true, it is not at all probable. It would be a case of railroads biting off their own nose to spite their face. Much of the Sunday travel is done by people who are making a short trip to visit a friend in another city, and if not taken at that day would never be taken at all. So that much of the business that is missed is lost forever for the railroad.

It is entirely probable that the traveling public, at least the Sunday traveling public, could stand the change as easily as the railroads.

## DOCTOR PRAISES D. D. D.

—Although an M. D., I acknowledge to my patients and patrons that your remedy, D. D. D., reaches cases of Bozema and permanently cures them.—Dr. Ira T. Gubbart, Caldwell, Kansas.

"My cure began from the first application of D. D. D. My skin is now as smooth as a baby's. I wouldn't take a thousand dollars for what D. D. D. has done for me," writes August Santa, of Chillicothe, Ohio.

These are just samples of letters we are receiving every day from patients all over the country.

"Worth its weight in gold," "All my pimples washed away by D. D. D." "I found instant relief," "D. D. D. is little short of miraculous." These are the words of others in describing the great skin remedy, D. D. D.

Proven by thousands of cures, for ten years to be absolutely harmless and reliable in every case of skin trouble, no matter what it is. Get a trial bottle today. Instant relief—only 25c. J. E. Daly.

## Interurban People Ready to start

The Chicago and Wisconsin Valley Street Railway company will begin actual work on the construction of its interurban line between this city and Portage as soon as the frost has left the ground, according to information given out at the local office.

The final survey in the city has been completed and the engineers moved Monday to Middleton, which place will be their headquarters while they are effecting a permanent survey in that locality. Later it will be transferred to points further north until the line has been located from here to Portage. It is the intention of the company to complete the line between Madison and Portage this coming summer, as well as the street railway in this city. The proposed line from Janesville to Madison will enter the city somewhere at the foot of West Washington avenue. It is at this point that actual construction will begin.—Madisonian.

## SEVERAL CASES IN JUSTICE COURT.

George Papas, who conducts the Olympia restaurant over Levin's store on the east side, was arrested on Tuesday morning charged with serving liquor in his place without a license. He pleaded not guilty to the charge and the case was adjourned for a week. It is alleged that Mr. Papas has been in the habit of serving beer at meals when requested to do so by his customers.

Charles Wakely, proprietor of the Jullien Hotel Buffet, was arrested and taken before Justice Pomerville on Monday on a charge of running a disorderly house. He pleaded guilty to the charge and the judge assessed him a pretty stiff fine, which with the costs were paid.

George Payne and George Lattrell were arrested on Monday morning and taken before Justice Pomerville on a charge of assault and battery. The warrant was sworn out by John Thiel, who claimed that Payne had struck him. Payne pleaded guilty to the charge and paid a fine and costs amounting to \$10.00. Lattrell pleaded not guilty and demanded an immediate trial, and after listening to all the evidence the judge dismissed him.

One Johnson, who hails from Port Edwards, was brought before Justice Pomerville on Tuesday for being drunk and disorderly and as he had no money with which to pay a fine the justice made it five days in jail. Johnson had just finished a term in jail on a similar charge, having been sentenced by Justice Cahill of Port Edwards.

## COUNCIL HOLDS WARM SESSION.

The monthly meeting of the city fathers held last night proved to be quite an interesting session, and a goodly crowd of spectators assembled to hear what there was doing.

One matter that came up was the proposition of building a bridge. Two bridges were presented, one for a bridge to take the place of the one now existing, and the other for a bridge further up the river. There was hardly a chance to present the petitions before it was moved and carried that the petitions be laid on the table. This ended the bridge matter in a very short time.

E. J. Wood appeared before the council with some data concerning a "city plan" for the purpose of beautifying the city. The proposition was to get a landscape artist to go over the whole city and lay out a plan which will cover everything and make any work that is done in keeping with the entire city. The council was asked to appropriate \$200 in conjunction with the Federated Clubs and the advancement association, making \$400 in all. The matter was referred to a committee, and there is no doubt but what the money will be forthcoming.

Several minutes of the council were spent at the council meeting and they presented a petition asking that the license of two saloon keepers in this city be revoked. The ones asked for were Chas. Wakely and Edwin Berg. Mayor Wheeler refused to grant the prayer of the petitioners, saying that the mayor and common council could not arbitrarily revoke a saloon license, and that he would not do so if he could revoke a license except on complaint made as provided by law and a hearing had. He further said: "It is a maxim of the law that any man, no matter how heinous the offense, he is charged with, is entitled to a fair and impartial trial. If at any time a complaint is filed according to law the council at law will take it up and the council act upon the same." Nothing further was said on the matter, and it is not known whether any further action will be taken or not.

Two new policemen were asked for to be on duty nights, it being considered that it was impossible for the present force to properly cover the city at night. The matter was turned down by the council.

The proposition of pumping the city water by some other means than electricity was taken up and discussed and a committee of three consisting of Aldermen Nash and Hamberg and Engineer Phillips were appointed to visit Menasha where a very economical plant is in operation, for the purpose of looking over the situation.

—Among books "The House of a Thousand Candles" is looked upon as the best seller. Among plays "The House of a Thousand Candles" is undoubtedly one of the best drawing cards the stage has ever known. On its presentation at Daly's Theatre on Monday evening its mysterious rooms and odd surroundings will be mounted in a most elaborate manner as the complete production is carried. The company has been most carefully selected so that all the unusual characters that add so much to the charm of both book and play will be most artistically drawn.

Rev. F. Nimitz of Sheboygan was a guest at the home of his daughter, Mrs. J. H. Linderman on Tuesday.

—The principal point made by Mr. Brazeau was that the owners of existing water power franchises considered that they had vested rights under them which could not be taken away that both the proposed regulation of the Huston bill and the state ownership proposed in the Gaylord bill contravened the constitution. A query as to whether the control or ownership of the water powers could not be attained through a constitutional amendment was met by Mr. Brazeau with the answer that even a state constitutional amendment would not permit the taking of property without due process of law. Senator Gaylord asked if the principal objection of Mr. Brazeau to his bill was not that it was a Socialistic measure and that its adoption meant Socialism. Mr. Brazeau admitted that this was one of the objections to the bill. The former state senator also spoke of the development of the state which has followed the development of the waterpowers and the development of such places as Neokosa with the resultant benefit to the state both in increasing their assessed valuation and in the establishment of prosperous communities.

Mr. Brazeau intimated that the water power owners would be perfectly willing that their position should be fought out in the courts should either the Huston or the Gaylord bills be enacted into law. The evening session of the committee was occupied by a discussion, by former Assemblyman Wm. M. Bray of Oshkosh, of the waterpower control bill which received the endorsement of a majority of the members of the special legislative committee of the legislature of 1909 appointed to investigate the question but which was never presented to this legislature, no member having been willing to introduce the bill.

## What They Think of Rouse.

J. D. Rouse of Auburndale, who is a candidate for the office of County Superintendent of Schools, has some strong recommendations from places where he formerly lived and taught school. One of these is as follows:

Mr. J. D. Rouse is well known in this county as an educator. He has filled some very important places, and his work has been very satisfactory.

I have always found him to be a perfect gentleman, and from my own personal observation I know him to be a strong teacher and worthy of any trust placed in his charge.

Supt. of Schools, Walworth Co.

## Junior Civic League.

The Junior Civic League was organized two years ago in the public schools. It was organized because we believe that the children are as important a factor in making our city more beautiful as are the older people.

It is a league for the training of all school children in the principles of laws, order, cleanliness and beauty.

The pledge reads as follows, I promise to try not to destroy any tree, shrub or lawn. Not to deface any fence or public building. Not to spit upon the sidewalks or floors of any street car or building. To keep the back yard as clean as the front, etc.

We will ask the children to sign this pledge but no dues will be charged for joining the league this year.

The members will have an opportunity of buying flower and vegetable seeds at a penny a package, no child buying more than five packages. The grades to which these flower seeds will be sold will be from the third to the seventh inclusive. Each child is to care for his own little plot of flowers or vegetables and dispose of the flowers and vegetables as he sees fit.

The flowers can be sent either directly or thru the committee to the hospital or sold and the vegetables can be sold and so make possible the starting of little bank accounts from the profits derived from the garden produce.

We expect to have a flower and vegetable exhibit in the fall and prizes will be awarded at that time. Schools in all parts of the country are doing this work either in a small or large way and very enthusiastic reports are given of the results.

We are beginning this phase of the Junior Civic League work in a small way but we hope that the work will enlarge each year and that the children will learn to observe and love the laws of nature, kindness to animals, respect for other's property, order, industry, perseverance, courage and patriotism, and the problems pertaining to Civic League work now will have vanished when our children attain to manhood and womanhood.

**REPRESENTED WATER POWER OWNERS.**

Attorney T. W. Brazeau of this city was in Madison on Thursday where he represented the side of the water powers before the legislature as a Committee of the whole, in a discussion of the water power control question. In speaking of the matter a correspondent for the Milwaukee News says:

The principal point made by Mr. Brazeau was that the owners of existing water power franchise considered that they had vested rights under them which could not be taken away that both the proposed regulation of the Huston bill and the state ownership proposed in the Claydon bill contravened the constitution. A query as to whether the control or ownership of the water powers could not be attained through a constitutional amendment was met by Mr. Brazeau with the answer that even a state constitutional amendment would not permit the taking of property without due process of law. Senator Gaylard asked if the principal objection of Mr. Brazeau to his bill was not that it was a Socialistic measure and that its adoption meant Socialism.

Mr. Brazeau admitted that this was one of the objections to the bill. The former state senator also spoke of the development of the state which has followed the development of the waterpowers and the development of such places as Neokosa with its regular benefit to the state both in increasing their assessed valuation and in the establishment of prosperous communities.

Mr. Brazeau intimated that the water power owners would be perfectly willing that their position should be fought out in the courts should either the Huston or the Claydon bill be enacted into law. The evening session of the committee was occupied by a discussion, by Former Assemblyman Wm. M. Bray of Oshkosh, of the waterpower control bill which received the endorsement of a majority of the members of the special legislative committee of the legislature of 1900 appointed to investigate the question but which was never presented to this legislature, no member having been willing to introduce the bill.

Mr. Brazeau intimated that the water power owners would be perfectly willing that their position should be fought out in the courts should either the Huston or the Claydon bill be enacted into law. The evening session of the committee was occupied by a discussion, by Former Assemblyman Wm. M. Bray of Oshkosh, of the waterpower control bill which received the endorsement of a majority of the members of the special legislative committee of the legislature of 1900 appointed to investigate the question but which was never presented to this legislature, no member having been willing to introduce the bill.

**REPRESENTED WATER POWER OWNERS.**

Attorney T. W. Brazeau of this city was in Madison on Thursday where he represented the side of the water powers before the legislature as a Committee of the whole, in a discussion of the water power control question. In speaking of the matter a correspondent for the Milwaukee News says:

The principal point made by Mr. Brazeau was that the owners of existing water power franchise considered that they had vested rights under them which could not be taken away that both the proposed regulation of the Huston bill and the state ownership proposed in the Claydon bill contravened the constitution. A query as to whether the control or ownership of the water powers could not be attained through a constitutional amendment was met by Mr. Brazeau with the answer that even a state constitutional amendment would not permit the taking of property without due process of law. Senator Gaylard asked if the principal objection of Mr. Brazeau to his bill was not that it was a Socialistic measure and that its adoption meant Socialism.

Mr. Brazeau admitted that this was one of the objections to the bill. The former state senator also spoke of the development of the state which has followed the development of the waterpowers and the development of such places as Neokosa with its regular benefit to the state both in increasing their assessed valuation and in the establishment of prosperous communities.

Mr. Brazeau intimated that the water power owners would be perfectly willing that their position should be fought out in the courts should either the Huston or the Claydon bill be enacted into law. The evening session of the committee was occupied by a discussion, by Former Assemblyman Wm. M. Bray of Oshkosh, of the waterpower control bill which received the endorsement of a majority of the members of the special legislative committee of the legislature of 1900 appointed to investigate the question but which was never presented to this legislature, no member having been willing to introduce the bill.

## Probably Only a Rumor.

There is a well defined rumor in railroad circles that within a short time the various railroads will announce the abandonment of all Sunday passenger trains. It is claimed this will be in line with the recent retrenchment orders of the roads, especially of the St. Paul lines, claimed to have been made necessary by recent adverse legislation. The reports could not be verified here, although several employees of the St. Paul admitted having heard of the proposed change. It is scarcely possible that either the St. Paul or Northern Western will abandon all Sunday trains in the northern part of the state because of the great amount of revenue which they bring during the summer and fall hunting seasons.—Morrill News.

While the above rumor may be true, it is not at all probable.

It would be a case of railroads biting off their own nose to spite their faces. Much of the Sunday travel is done by people who are making a short trip to visit a friend in another city, and if not taken on that day would never be taken at all.

So that much of the business that is missed is lost forever for the railroad.

It is entirely probable that the traveling public, at least the Sunday traveling public, could stand the change as easily as the railroads.

**Interurban People Ready to start.**

The Chicago and Wisconsin Valley Street Railway company will begin actual work on the construction of its interurban line between this city and Portage as soon as the frost has left the ground, according to information given out at the local office.

The final survey in the city has been completed and the engineers moved Monday to Middleton, which place will be their headquarters while they are effecting a permanent survey in that locality. Later it will be transferred to points further north until the line has been located from here to Portage.

It is the intention of the company to complete the line between Madison and Portage this coming summer, as well as the street railway in this city. The proposed line from Janesville to Madison will enter the city somewhere at the foot of West Washington avenue. It is at this point that actual construction will begin.—Madisonian.

**SEVERAL CASES IN JUSTICE COURT.**

George Papas, who conducts the Olympia restaurant over Levin's store on the east side, was arrested on Tuesday morning charged with serving liquor in his place without a license. He pleaded not guilty to the charge and the case was adjourned for a week.

It is alleged that Mr. Papas has been in the habit of serving beer at meals when requested to do so by his customers.

Charles Wakley, proprietor of the Julien Hotel Buffet, was arrested and taken before Justice Pomerville on a charge of assault and battery. The warrant was sworn out by Chas. Thiel, who claimed that Papas had struck him. Papas pleaded guilty to the charge and paid a fine and costs amounting to \$10.40. Lattorrell pleads not guilty and demanded an immediate trial, and after listening to all the evidence the judge dismissed him.

Gus Johnson, who hails from Port Edwards, was brought before Justice Pomerville on Tuesday for being drunk and disorderly and as he had no money with which to pay a fine the justice made five days in jail. Johnson had just finished a term in jail on a similar charge, having been sentenced by Justice Cahill of Port Edwards.

Sidney Keltner was arrested and taken before Justice Brown on Monday on a statutory charge. An adjournment for one week was taken, bail being fixed at \$500.

**FARMERS DO NOT WANT RECIPROCITY.**

The Tribune is in receipt of a pamphlet issued by the National Grange which gives the speech made by Aaron Jones before the committee on Ways and Means on Feb. 9th, 1911. Mr. Jones' speech was against President Taft's reciprocity bill and he gave as his grounds for the speech that the new bill puts all kinds of farm products on the free list, while manufactured products are still protected the same as before.  
Now the Tribune is in favor of free trade, or, in case the other country has a tariff, of reciprocity, but it does not believe in free trade on one commodity and in protecting another. Neither farming nor manufacturing are "infant industries" in the United States at the present time, and it was to protect the infant industries that a tariff was originally put on products of all kinds, and as the manufacturers have been fussy and powerful enough to have the tariff maintained on what they turn out, the farmer has been kept in line by putting a prohibitive tariff on what he produces.  
Mr. Jones in his speech says "No, it is not the tariff on farm products that is responsible for the high cost of food, but the excessive freight charges on the railroads, and the exorbitant profits of commission houses, wholesale dealers and retailers, thru whose hands the products must pass to reach the consumer."  
Maybe Mr. Jones will tell us what the use of a protective tariff is to the farmer if it does not raise the price of farm products any.  
If the products come in free and thereby lowered the price any, it should have a tendency to cut out the dealers and middlemen's profit just the same as the farmers, and thus regulate the price to where it properly belonged.  
It's a poor rule that does not work both ways.  
If a tariff protects the farmer it robs the consumer, and if it does not raise the price of products how can it protect the farmer?  
At the same time the farmer pays for protection machinery and the kinks. The same machine can be shipped several thousand miles into another country and sold for less than it is in this country, and the manufacturer is glad to get the business, but when it is a home farmer that wants the machine, he has to dig up an extra price.  
When all the people learn that the tariff is a local issue and what is good for one man simply robs another, then this tariff business will be done away with and people will be allowed to buy in the market where they can get the cheapest rates. With free trade and government regulation of freight rates each man will stand about an equal show, and that is what every honest man wants to see.

**Coal Rates Remain Up.**

The Wisconsin state railroad commission on Saturday ordered the all-rails to reduce the rates on soft coal from lake ports to the Fox River valley cities having paper and pulp mills, including Neenah, Kaukauna, Appleton and Menasha, from 75 to 65 cents per ton.  
At the same [time] the commission refused to order a reduction in the rate of \$1 per ton on soft coal shipped to points in the Wisconsin River Valley, including Grand Rapids, Stevens Point, Waupun, Rhinelander, Merrill and other points. The present rate on coal from any of the lake ports, between and including Green Bay and Milwaukee, is \$1 for soft coal and \$1.50 for hard coal. An application for a reduction in these rates was made some time ago, with the above result.

**Weighing of Mails to Begin.**

A dispatch from Chicago says that railroad officials in that city have been notified by the postoffice department that the quadrennial weighing of mails in this territory will begin about the 20th of February. The United States has been divided into four districts by the postoffice department for the purpose of carrying out its plan of mail weighing, and once every four years, in each district the mails are weighed, throughout a period of 105 days. The tonnage figures obtained in this way are used as a basis for calculating the amount to be paid the railroads at present holding mail contracts, throughout long period.

**PITTSVILLE.**  
(From the Record.)  
Three business places were entered in this city between midnight and morning Monday of this week: the United States Post Office, the jewelry store of A. V. Austin and the hardware store of the Pittsville Hardware Co. The store of the Pittsville Hardware Co. was entered from the rear, a window pane having been broken and entrance made into the tin smith's room of the establishment. From here the interior door with three latches was battered in with tools of the concern. No evidence that anything had been taken here, except that the cash drawer had been rifled of less than a dollar, was apparent. That it was the money the robbers were after, and nothing else, is noted from the jewelry store robbery. Nothing here, apparently, was molested except that which might contain coin or bills. The money drawer was torn from its hinges, but nothing but a few pennies taken. The call at the postoffice was made more openly and in defiance of the main street and houses directly across. The glass at the front door was broken, the spring lock operated through this opening from without and the entrance made by merely lifting the latch. After this bold stroke, they entered the inner room and proceeded to take whatever they could and from the safe which had not been locked. This happened to be a bag of money which amounted to in the neighborhood of a hundred dollars. Nearly twice this amount in stamps was left intact, although the drawer at the delivery window was rifled of some fifty dollars worth of stamps.

**WITNESS.**

[Written on the death of Harry Lundgren of South Rudolph, who died Feb. 19, 1911.]  
He has left this cold world, full of trouble and woe  
For that fair sunny land where soft breezes blow,  
Yes, friends, we trust he has gone  
To that land where sorrow and pain are unknown.  
The spirit God gave him has gone home to its rest,  
Where there's health and there's peace in the land of the blest.  
That land my dear friends is more lovely than this;  
The skies are more clear, there is nothing but bliss.  
The sun it shines always year after year,  
And those who are there have nothing to fear,  
They never grow weary by trouble or care  
For all things are pleasant for everyone there;  
'Tis God's home for his people, their last place of rest,  
For there's joy and love in the land of the blest.  
Remember, dear friends, he's not alone,  
His sisters, his brothers, his dear ones had gone  
A few years before him, but at God's chosen time;  
But we trust they're together, and all are at rest  
In God's chosen land in the home of the blest.  
From a Friend.

**Two Swindlers.**  
Medford Star-News—"Two 'specialists' by the names of 'Drs.' Locke and Millard fleeced a good many people in this vicinity last week. They posed as 'specialists and hired rigs to take them around in the country, and the way they bled some of our town of Medford farmers is a caution. One of them went into a farmer's home east of town and told the man's wife that she would be blind in six months. The poor woman fainted and after she came to, he tried to calm her feelings by offering to fit glasses for her and her husband for \$85. She had a serviceable pair of glasses purchased from one of our local dealers which he pronounced worthless. The money was paid but as the glasses did not fit and caused such a headache that they could not be endured, the interested parties sought legal advice and succeeded in getting their money back. We are informed that these swindlers charged and received from 12 to 35 dollars from people who ought to know better. The list includes a goodly number of our most progressive and intelligent farmers. Barrow said that the American people like to be humbugged and it looks as though it were true when people will let strangers fleece them for five or six hundred dollars in a few days chucking them fine prices for useless goods when they can get good fitting glasses of home merchants at right prices. These 'doctors' were not doctors, at least they did not register.

**NATURE TELLS YOU.**

As Many A Grand Rapids Reader Knows Too Well.  
—When the kidneys are sick, Nature tells you all about it. The urine is nature's calendar. Infrequent or too frequent action; Any urinary trouble tells of kidney ills.  
Donn's Kidney Pills are for kidney ills.  
Grand Rapids people testify to their worth.  
Mrs. Edward Mahoney, 477 First St. N., Grand Rapids, Wis., says: "I had an extreme lameness across my back and this was accompanied by pains in my kidneys. Whenever I lifted or stooped, my condition was worse. My kidneys were inactive and dizzy and nervous spells were common. Soon after I began taking Donn's Kidney Pills, I improved and before long this remedy restored my kidneys to a normal condition. I know that Donn's Kidney Pills can be depended upon. To act just as represented."

## Reasons Why.

Below are some of the reasons why money deposited in the First National Bank of Grand Rapids is absolutely safe.

The First National Bank is the oldest bank in the County and has passed through all the panics and become stronger every year, until it is "panic proof."

The funds are invested in accordance with the National banking law.

The stockholders are all financially strong and if necessary the law requires them to make good any losses to the amount of \$50,000.00.

The large capital and surplus of the bank also stands between the depositor and any possible loss.

The bank is under the direct supervision of the National government and regularly examined by its officials.

### FARMERS DO NOT WANT RECIPROCITY.

The Tribune is in receipt of a pamphlet issued by the National Grange which gives the speech made by Aaron Jones before the committee on Ways and Means on Feb. 9th, 1911. Mr. Jones' speech was against President Taft's reciprocity bill and he gave as his grounds for the speech that the now bill puts all kinds of farm products on the free list, while manufactured products are still protected the same as before.

Now the Tribune is in favor of free trade, or, in case the other country has a tariff, of reciprocity, but it does not believe in free trade on the commodity and in protecting another.

Neither farmer nor manufacturer are "infant industries" in the United States at the present time, and it was to protect the infant industries that a tariff was originally put on products of all kinds, and as the manufacturers have been so successful in their efforts to have the tariff maintained on what they turn out, the farmer has been kept in line by putting a prohibitive tariff on what he produces.

Mr. Jones in his speech says "No, it is not the tariff on farm products that is responsible for the high cost of food, but the excessive freight charges on the railroads, and the exorbitant profits of commission houses, wholesale dealers and retailers, thru whose hands the products must pass to reach the consumer."

Maybe Mr. Jones will tell us what the use of a protective tariff is to the farmer if it does not raise the price of farm products any.

If the products came in free and thereby lowered the price any, it should have a tendency to cut out the dealers and middleman's profit just the same as the farmers, and thus regulate the price to where it properly belonged.

It's a poor rule that does not work both ways.

If a tariff protects the farmer it robs the consumer, and if it does not raise the price of products how can it protect the farmer?

At the same time the farmer pays for protection machinery and he kicks. The same machine can be shipped several thousand miles into another country and sold for less than it is in this country, and the manufacturer is glad to get the business, but when it is a home farmer that wants the machine, he has to dig up an extra price.

When all the people learn that the tariff is a local issue and what is good for one man simply robs another, then this tariff business will be done away with and people will be allowed to buy in the market where they can get the cheapest rates. With free trade and government regulation of freight rates each man will stand about an equal show, and that is what every honest man wants to see.

### Coal Rates Remain Up.

The Wisconsin state railroad commission on Saturday ordered the railroads to reduce the rates on soft coal from lake ports to the Fox River valley cities having paper and pulp mills, including Neenah, Kaukauna, Appleton and Menasha, from 75 to 75 cents per ton.

At the same time the commission refused to order a reduction in the rate of \$1 per ton on soft coal shipped to points in the Wisconsin River Valley, including Grand Rapids, Stevens Point, Waupun, Rhineland, Merrill and other points. The present rate on coal from any of the lake ports, between and including Green Bay and Milwaukee, is \$1 for soft coal and \$1.50 for hard coal. An application for a reduction in these rates was made some time ago, with the above result.

### Weighing of Mails to Begin.

A dispatch from Chicago says that railroad officials in that city have been notified by the postoffice department that the quinquennial weighing of mails in this territory will begin about the 20th of February. The United States has been divided into four districts by the postoffice department for the purpose of carrying out its plan of mail weighing, and once every four years, in each district the mails are weighed, throughout a period of 105 days. The tonnage figures obtained in this way are used as a basis for calculating the amount to be paid the railroads at present holding mail contracts, throughout long period.

It surely is a great thing to be satisfied with what we have.—Edward Bok.

### PITTSVILLE.

(From the Record.)

Three business places were entered in this city between midnight and morning Monday of this week: the United States Post Office, the jewelry store of A. V. Austin and the hardware store of the Pittsville Hardware Co. The store of the Pittsville Hardware Co. was entered from behind a rear, a window pane having been broken and entrance made into the tin smith's room of the establishment. From here the intruder found with three latches was battered in with tools of the concern. No evidence, except that the cash drawer had been rifled of less than a dollar, was apparent. That it was the money the robbers were after, and nothing else, is noted from the jewelry store robbery.

Nothing here, apparently, was molested except that which might contain coin or bills. The money drawer was torn from its hinges, but nothing but a few pennies taken.

The call at the postoffice was made more openly and in defiance of the main street and houses directly across. The glass at the front door was broken, the spring lock operated through this opening from without and the entrance made by merely lifting the latch. After this bold stroke, they entered the inner room and proceeded to take whatever they could and from the safe which had not been locked. This happened to be a bag of money which amounted to in the neighborhood of a hundred dollars. Nearly twice this amount in stamps was left intact, although the trawler at the delivery window was rifled of some fifty dollars worth of stamps.

Mr. and Mrs. C. H. Dawes left this week for an overland visit at several places which will take them about ten days. They will first stop at Win. Muskins, at the poor farm, then they will visit Old Pittsville at Stevens Point, then Fred Backlund's home at Sheridan, and A. C. Galloway and family, at Waupun, from there to Almond to visit Ed. Dawes and family, thence home.

While they are away the Willows will be under the management of the Bachelor Dawes. Oat and see him.

P. C. Dahlgrud was down from Chrysler Falls, Mich., last week where he has been for the past two months. He returns this week taking Mrs. Dahlgrud with him. He has entered the lumber business with his son-in-law, Mr. Paulsen, who says is doing a good business. James Oake will operate the Dahlgrud farm the coming summer.

Dr. Edw. Hengen has made the purchase of a new Olds automobile which he became infatuated with while at the show at Milwaukee recently. He has traded in the old machine on the purchase price.

### ARPIN

Song service at 10:30 Sunday school at 11. Everyone come.

Don't forget what the Royal Neighbors told you last week. They are going to have a Saffragette social at the Arpin Hall Saturday night, March 11, 1911. They will render a program, you boys can see what it looks like, and as a saffragette's husband disliking a laugh and how happy they will look when they are on equal footing with their better half. Waiting on table by the old boys may be a little rough on rats to begin with, but the men can always adopt themselves so well to the inevitable that they will soon be as handy as a pocket in a night shirt. Be sure and come for you will have a good time. Admission 10 cents.

Mr. and Mrs. Whitbeck are the proud parents of another girl. All are doing fine.

Mr. Laidlow purchased another horse last week.

Gordon Morris was in this neighborhood one day last week and left his two boys with his sister-in-law, Mrs. Blunt, then went back to Montana where he left his wife sick in the hospital. She has typhoid fever, and we hope it is not serious. His mother went as far as Merrill Junction on her way to Baraboo to attend the funeral of her brother-in-law there.

Mrs. Gronemeyer and her daughter Edna. Miss Dora Johnson were in Grand Rapids Saturday on a shopping expedition. It looks as if something was going to happen to some one if this buying of kitchen utensils keeps on.

### MEEHAN

Mr. Seamon of Mill Creek visited at the Glendinning home a few days last week.

Jack Lutz, the Grand Rapids cattle buyer, was thru here last week picking up stock for the markets. Our town treasurer, Geo. Cartmill of McDill, was attending to official duties here Saturday.

Harney Galitski moved to his father's farm near Plover last week. He will take charge of the old homestead and make his future home.

There will be a social party held at the home of B. S. Fox Wednesday evening, March 15. Foxwoods will be turned over to the Sunday school. All are cordially invited to attend.

We had a nice little snow storm Sunday which of course encourages those who are still behind with their winters hanging up and are wishing for more sleighing.

Mr. Cole has sold his farm here to Leon Wozzalla of Plover and Mr. Walkush of Oshkosh. He is now owner of the Oshkosh creamery having taken it as part payment on his farm.

The death of Silas Clark of Plover was sad news to a good many here as he was well known and had many friends who will long cherish his memory as a soldier and good citizen.

Mr. and Mrs. Aug. Jacoby were shopping in your city Saturday.

Miss Irma Hassell was home to spend Sunday.

The Joe Rayome and Jasper Crockett farms were sold to men from Green County. Messrs. Rayome and Crockett went to your city Monday noon to make out the papers. The purchasers are brothers named Bauffman and they paid Mr. Crockett \$5000 and Mr. Rayome \$7000 for the places.

Mr. and Mrs. Paul Mountain returned Monday noon from Mosinee where they had been visiting for over a week.

[Written on the death of Harry Lundgren of South Rudolph, who died Feb. 19, 1911.]

He has left this cold world, full of trouble and weep  
For that fair sunny land where soft breezes blow,  
Yes, friends, we trust he has gone  
To that land where sorrow and pain are unknown.

The spirit God gave him has gone home to its rest,  
Where there's health and there's peace in the land of the blest.  
That land my dear friends is more lovely than this;  
The skies are more clear, there is nothing but bliss.

The sun it shines always year after year,  
And those who are there have nothing to fear,  
They never grow weary by trouble or care  
For all things are pleasant for everyone there.

'Tis God's home for his people, their last place of rest,  
For there's joy and love in the land of the blest.  
Remember, dear friends, he's not alone,  
His sisters, his brothers, his dear ones had gone  
A few years before him, but at God's chosen time;  
But we trust they're together, and all are at rest  
In God's chosen land in the home of the blest.  
From a Friend.

### NEKOOSA

(From the Times)

The convention of Dist. No. 15, L. O. O. F., was held at Nekoosa last Friday, the afternoon session opening at three o'clock with president M. E. Bruce of Stevens Point in the chair. There were five members present from Stevens Point, two from Pittsville and 20 from Grand Rapids. Plover lodge had no delegates at the convention. Routine business was transacted at the afternoon session and the following officers elected and installed for the following year.

President—S. L. Stevens, Nekoosa. Vice President—H. Rablin, Grand Rapids. Warden—F. Seidl, Pittsville. Secretary—A. F. Behrendt, Stevens Point. Treasurer—L. Schroeder, Grand Rapids.

President Stevens appointed the following to complete the list of officers: Marshall—Chas. Dittman, Stevens Point. Conductor—W. A. Robinson, Nekoosa. Inside Guardian—J. G. Stroppe, Stevens Point. Outside Guardian—A. E. Fewell, Grand Rapids.

Chaplain—A. M. Blaisdell, Plover. The convention decided to hold the next meeting at Pittsville in May, and the lodge there will suggest a date.

Neal Crowns returned Saturday evening from Chicago, where he has established a real estate office at 90 La Salle St., with his sons Neal and George, in charge. Mr. Crowns has been very successful in handling farm lands in this city and finds it to his advantage to maintain a permanent office at Chicago.

## ADDITIONAL LOCALS

Leo Barrett departed on Thursday for Milwaukee where he has secured employment.

Alderman Panter of the east side is reported to be seriously ill with tuberculosis.

Come and look at our spring coats. You will be surprised at the low prices. Heinemann Mercantile Co.

Wm. E. Little is able to get about again with the aid of a pair of crutches, and states that he hasn't felt so good for a number of years past.

Ed. Harding, who has been employed in the Gazette office at Green Bay during the past winter, where he was operating a linotype, is home to visit his parents for a short time.

Mrs. P. H. Bean, wife of ex-County Treasurer Bean, is reported to be quite ill with brights disease. Mr. and Mrs. Bean now reside on their farm in the town of Hansen.

We are also in the insurance business and write fire, life, accident and tornado insurance at lowest prices. See us before taking out a policy. Grand Rapids Real Estate Co.

We have marsh lands, sandy loam farms, clay soil farms and wild lands for sale or trade. See us when you are looking for a bargain. Grand Rapids Real Estate Co.

The weird happenings, the strange characters, the spiritual mediums so vividly described in that successful novel "The House of a Thousand Candles," are even more bewildering in the dramatization that has created a furore in theatrical circles. On its production at Daly's Theatre on Monday evening the play will be elaborately staged and excellently acted. "The House of a Thousand Candles" is one of the few attractions that has secured an immediate success. This is due to the novelty of its story that is so decidedly different from anything heretofore given on stage. The four acts of the play are staged with special scenery.

All our coats in stock to be sold at half price to make room for our new line. Heinemann Mercantile Co.

## ALTDORF

Mrs. Aug. Steiner and son Joseph of Manitowish spent several days visiting relatives here last week. Her daughter Sophie who has been here for several weeks returned home with her mother.

A baby boy arrived at the home of Robert Leu last Friday morning and we were told that you can't touch Bob with a ten foot pole now.

Frank Shear is building an addition to his new house and O. J. Leu is building a new wagon and machine shed.

E. J. Conklin and family intend to leave in the near future for Milwaukee. He intends to have an auction before leaving.

Wm. Peterich and Mr. Gronemeyer from near Arpin were in this neighborhood Friday looking over the country, cattle, silos, etc.

Mrs. Anton Komatz is still seriously ill.

We notice that almost all the newspapers are urging the ratification of Pres. Taft's reciprocity (?) treaty with Canada. Queer reciprocity that, which puts all the farmer raises to sell on the free list and retains a tariff on all manufactured articles that are to come in from Canada which the farmer might purchase. It looks like another case of protecting our poor, infant (?) manufacturing interests at the expense of the farmer. The farmer is handed the tarred out of the "reciprocity" stick. The negotiations were carried forward on the part of the United States by numerous employees of the state department and on the part of Canada by two eminent experts whose names carry weight. And they did up the United States to the tune of several million dollars. With them it was business, with our representatives sentiment and politics. Give us real reciprocity and I hardly think there would be much objecting.

Time to pay Equity dues.

Mrs. P. F. Bean is very ill at this writing with small chance for recovery.

It looks as though we wouldn't have a hay famine after all as it is quoted a couple of dollars a ton cheaper now than a few weeks ago. We just received quotations on No. 1 Timothy of \$15.50; choice alfalfa \$17.00; No. 1, \$15.50; and choice clover \$12.50 delivered at station here. These prices were quoted by F. W. Taylor and Co., Kansas City, Mo., and they have dealt fairly with the farmers.

Our spring coats are now ready for your inspection. Heinemann Mercantile Co.

Many people hesitate about coming to the bank with a small deposit. Some have an impression that to have a bank account necessitates a large amount of money.

We admit that A LARGE BANK ACCOUNT is a very satisfactory thing to have, and many of our Savings Accounts have grown to a considerable size. Most of them, however, started with a small amount, and we invite you to do likewise. Money in the bank gives you "that independent feeling."

Deposits made on or before March 13th draw interest from March 1st.

Mr. Ragan will continue to conduct the business the same as before, while Mr. Shaver expects to leave in the near future for Buckley, Minn., where he will engage in business.

Get Good Position.

It will be pleasing news to the many friends of Alan Gibbs whose home is in Deerfield to learn that he has just completed a course in the Grand Rapids Business College and accepted a position with the First National Bank of that city. Alan finished the business course in a little less than four months. Two other students, young ladies, from the same school also took positions last week, one going to Neenah as stenographer and cashier in Greenberg's large department store and the other as stenographer for the Grand Rapids Milling Co. The Grand Rapids Business College seems to be growing in popularity and patronage every year. Fifty seven students have enrolled there so far this year. We understand that the institution has more calls for competent, reliable young men and women for office help than it can fill. Anything concerning this school or of special interest to News readers as it was founded by Earl Hayward a Hancock boy, whose industry and perseverance are bringing it success. — Hancock News.

Reasons Why.

Below are some of the reasons why money deposited in the First National Bank of Grand Rapids is absolutely safe.

The First National Bank is the oldest bank in the County and has passed through all the panics and become stronger every year, until it is "panic proof."

The funds are invested in accordance with the National banking law.

The stockholders are all financially strong and it is necessary the law requires them to make good any losses to the amount of \$50,000.00.

The large capital and surplus of the bank also stands between the depositor and any possible loss.

The bank is under the direct supervision of the National government and regularly examined by its officials.

## Gets Good Position.

It will be pleasing news to the many friends of Alan Gibbs, whose home is in Deerfield, to learn that he has just completed a course in the Grand Rapids Business College and accepted a position with the First National Bank of that city.

Alan finished the business course in a little less than four months. Two other students, young ladies, from the same school also took positions last week, one going to Neenah as stenographer and cashier in Greenberg's large department store, and the other as stenographer for the Grand Rapids Milling Co. The Grand Rapids Business College seems to be growing in popularity and students have enrolled there so far this year. We understand that the institution has more calls for competent, reliable young men and women for office help than it can fill.

Anything concerning this school is of special interest to News readers as it was founded by Earl Hayward a Hancock boy, whose industry and perseverance are bringing it success. —Hancock News.

## Reasons Why.

Below are some of the reasons why money deposited in the First National Bank of Grand Rapids is absolutely safe.

The First National Bank is the oldest bank in the County and has passed through all the panics and become stronger every year, until it is "panic proof."

The funds are invested in accordance with the National banking law.

The stockholders are all financially strong and if necessary the law requires them to make good any losses to the amount of \$50,000.00.

The large capital and surplus of the bank also stands between the depositor and any possible loss.

The bank is under the direct supervision of the National government and regularly examined by its officials.

# THAT AWFUL BACKACHE

Cured by Lydia E. Pinkham's Vegetable Compound

Morton's Gap, Kentucky.—"I suffered two years with female disorders, my health was very bad and I had a continual backache which was simply awful. I could not stand on my feet long enough to cook a meal's victuals without my back nearly killing me, and I would have such dragging sensations I could hardly bear it. I had soreness in each side, could not stand tight clothing, and was irregular. I was completely run down. On advice I took Lydia E. Pinkham's Vegetable Compound and Liver Pills and an enjoyable good health. It is now more than two years and I have not had another pain since. I do all my own work, washing and everything, and never have the backache any more. I think your medicine is grand and I praise it to all my neighbors. If you think my testimony will help others you may publish it."—Mrs. OLLIE WOODALL, Morton's Gap, Kentucky.

Backache is a symptom of organic weakness or derangement. If you have backache don't neglect it. Do get permanent relief you must reach the root of the trouble. Nothing we know of will do this so surely as Lydia E. Pinkham's Compound.

Write to Mrs. Pinkham, at Lynn, Mass., for special advice. Your letter will be absolutely confidential, and the advice free.

Violation. "They have expelled my favorite water from his brotherhood," said one hotel patron. "Yes," replied the other, "he accidentally spilled and said, 'Thank you,' a dollar's worth for a 50-cent tip."

Important to Mothers. Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Dr. J. C. Watson*. In Use For Over 30 Years. The Kind You Have Always Bought.

The Final Settlement. "A verdict for \$10,000 isn't so bad," said the junior partner. "How much shall we give our client?" "Oh, give him \$10,000," answered the senior partner. "But hold!"

"Don't be hasty. Promise to give him \$50."

DISTEMPER. In all its forms among all ages of horses, as well as dogs, cured and others in same stable prevented from having the disease with SPURIN'S DISTEMPER CURE. Each bottle sold last year \$3.00 and \$10.00. Any good druggist, or send to manufacturers. Agents wanted. Spurin Medical Co., Spec. Contagious Diseases, Goshen, Ind.

## LACE AND GOLD RULE

LUXURIES IN MILLINERY WHICH WOMEN MUST HAVE.

Pretty Year-Round Hat of Golden Tissue and Net, and Another for Summer of White Hemp and Coral.

A gold hat for all the year round, and a spring round hat serve to show the growing furor for lace and gold. When you add to them the corals, and other beads and mock jewels, it is evident that a taste for the luxuries in millinery keeps pace with the higher cost of living that we hear so many murmurs over. Women positively refuse to allow their hats to reflect the chill of penury. In them they may indulge a little "the splendor dear to women" which is born in the eternal feminine. They are entirely right. If we must skim on some item of the spring outfit, don't let it be on the hat. That catches the eye first and holds it longest; so it must be a real poem and not a doggerel verse. Let it tell a cheerful story bespeaking plenty and a happy fancy.

The gold hat shown in the picture is made over a wire frame covered with gold tissue. An airy crown of gold net is draped over the tissue. The coronet is covered with a band of heavy fish lace lined with an ornate warm shade. The gardenia at the side might also be in gold, but is more effective with its waxy petals of white bearing a blush of pink. Millinery with the gold hat is not so extravagant as we might conclude, because her hat is an all-the-year-round affair, which knows no special season or time. Besides, there is no gown for any sort of dress-up occasion with which she may not complete her toilette by donning the hat of gold.

The round hat of pure white hemp is a summer time affair with a band of lace decorated with coral beads in pink and white, and a bow and wings made of lace at the back. Coral velvet is

folded about the edge of the hat and supplies a knot for the lace bow. The whole combination is very rich and very generally useful for summer. Just at present white with black, and white with coral, appear to be appermost in the minds of the designers and many are the lovely fancies that are translated into millinery.

It is true of us, as of the savage, that the strongest appeal comes from the decorative rather than the useful in apparel. Men are glorying in fur coats of pointed fur at six hundred dol-

lars per collar, and if not pointed fox, then sealskin or some other fine fur. And women are taking to gold and lace and corals, and jeweled bands, but more especially to lace. Race petals are made in the millinery shops and many lace flowers show the beauty of these flower children of the brain.

## PRACTICAL LITTLE PENWIPER

It Can Be Made in a Few Minutes and is Suitable for Home Use or Bazaar.

Either for home use or for sale in a bazaar, the very practical little penwiper shown in our sketch is well worth remembering. In making articles for bazaars, they should, of course, always answer the purpose that they are intended for, and the more quickly they can be made the larger the stock on the stall will be.

This little penwiper can be made in a few moments, with the aid of any little china ornament of a suitable shape and size. Charming little Japanese ornaments in great variety can be bought at a trifling cost and are especially suitable for the purpose. All that has to be done is to cut a strip of cloth of a dark color for preference, as it will not show the ink stains as much as a light material, and on one side cut the edge into points. The cloth is then rolled up and tied tightly together on the opposite side to that on which the points have been made.

The little sketch at the top left-hand side illustrates this. It can then be fitted into the neck of the little ornament and the pen-wiper is ready for use, or for sale as the case may be.

Hints for Womankind. Gold dust is sprinkled in the hair. Heavy cords are used as trimming. Ribbons and bows will be trimming for large flat hats.

The high turned-over director collar is used on coat costumes. The satin cape coat lined with brilliant green velvet is a novelty.

The peasant collar is gaining in favor. The hair is parted braided and wound in two twists over the ears. Little children also wear their hair in this style.

Revealing dresses may now show the crown of the shoulder. This "cowl" décolletage is reminiscent of Empress Eugenie's time. A fichu of airy tulle is draped over the shoulders and brought to the front under a cluster of flowers.

New Persian Scarf. A new effect in Persian scarfs is one composed of alternate stripes of Paisley chiffon and wide checked white marquisette.

Cleaning the Shoulder Shawl. The fluffy little white shoulder shawl is easily soiled, and it will not stand rough handling in the washing.

Make a warm suds with a pure soap. Press the shawl down firmly into the suds and leave there for about 20 minutes, then put your hand under the water, squeeze and squeeze, never lifting the shawl out of the water.

When the suds look dirty, press the shawl into a ball, still under the water, then lift it out and wash again in clean suds. Rinse well in water the same temperature, being careful not to lift the shawl, which would stretch the wool apart.

When it is clean take it out and spread carefully on a sheet, on the grass in summer or on a floor near a register in winter. As it dries, shake occasionally. The shawl will be as white and fluffy as new.

Though An Effective Decoration, It Soon Wears Out and is Not Very Easy to Match.

The women who have adopted the present fashion of putting wide silk braids on their winter suits and gowns are wondering if they were wise to do it. That it is an effective decoration no one denies, but another fact is equally clear, which is that the braid does not give good service.

Its weave is so loose, its mesh so wide that its contact with any outside object is apt to cause disintegration. One piece pulls out, and it soon looks like astrakhan instead of braid.

The surface is soon covered with a succession of wooly knots. These in turn continue to catch on whatever they brush against and begin to unravel. Women who had this braid put on their suits at the first of October are now trying to match it for patching and piecing.

This in itself is not an easy task. Several dozen designs were brought out in the early fall, many of which

## NOTES FROM MEADOWBROOK FARM

By William Pitt

Remove the orchard litter.

Sweet clover is very drouth-resistant.

Plan for an orchard this year, if you haven't got one.

The cow is the final judge as to the real worth of silage.

Rye straw is of very little use on the farm except for bedding.

A cow should be dried off for a few weeks before the calving period.

Keeping records of the cows is oftentimes the first step toward success.

During the summer months poultry consume a large amount of green forage.

Chickens are always considered more or less of a side line on the farm.

Plenty of outdoor exercise and fresh air will insure a crop of vigorous lambs.

Regularity in milking helps the flow during the present and all subsequent lactation periods.

Good drainage to a cow stable is absolutely necessary, and a cement floor serves this end to good advantage.

Keep your chicks on dry ground, where they can get no red worms, and they are not likely to have gaps.

Except when pigs are small, two feedings of warm, sloppy feed per day, morning and evening, is sufficient.

The trap nest picks out the layers, the best brooders, the drones and the unprofitable hens as well as the egg eaters.

The season has arrived when farmers and gardeners should begin testing seeds to determine their power of germination.

There will be no danger of white specks, or black specks either, in the butter if the cream is strained into the churn.

The sooner anyone gets rid of "cull" stock the better, and when a favorable opportunity comes it is well to take advantage of it.

A cow that is run down or hide-bound, the result of faulty digestion and assimilation, needs a tonic to build up her blood.

Many of the troubles experienced at lambing time are the result of rough handling and treatment during the period of pregnancy.

The farmer's family is fortunate in having an abundance of good food at all seasons of the year, but this is especially true in the winter.

Every farmer can have plenty of eggs and chickens for himself and for market if he will only turn a little of his energy toward the hen house.

Are there not some places about the farm where evergreens ought to be planted? They make a splendid wind-break about the barns and yards.

In hauling manure, ice, wood or other slow work about the farm where a team stands a good share of the time the use of blankets is to be recommended.

You must keep track of your hens and know what they are doing if you are going to keep them at all, and then you can have as large a flock as you can manage.

There is no danger of cattle choking on shredded fodder. They chew it the same as hay before they attempt to swallow it and it goes down their throats as easily.

Someone who has not been asleep all the time during recent years has said: "Cement and alfalfa are going to make western farmers the most independent people on earth."

For lice on hogs sprinkle them with a trustworthy dip, which can be done most readily with a sprinkling can, or by pouring slowly into a can which has been filled with holes in the bottom.

Sweet corn is one of the best summer table vegetables. Grow plenty of it this year, and have a succession coming on for late summer and fall use. A good way to get an early start of sweet corn is to plant seeds in pieces of sod in the house or hot-bed and plant the young corn in the garden as soon as the weather outside will permit.

The value of manure varies with the water content. Manure from cattle contains a large amount of water. Manure from horses and sheep has much less, because, on account of the shape of the bowel, it comes in pellets or balls, and hence has a chance to dry out. Therefore, it has much more nitrogen, phosphorus and potash per ton than that from cattle. This is particularly true of sheep, on account of the exceeding dryness of the product.

Before the appearance of blossoms and foliage spray for soft scale and like insects with the lime-sulphur wash or kerosene emulsion. No fruit grower can expect to have clean, healthy trees unless he uses sprays and washes.

Given plenty of good roughage and a light grain ration, of whatever kind, supplemented with a little oil, and some root crops or corn, silage for succulence the ewes should be in ideal flesh condition at lambing time.

Don't forget the machinery, the tools and implements that may need a little tinkering with here and there, to be put into good working order, so that they may be ready at the first call of the new season and not cause you delay.

It is advisable to gain the bull's confidence and let him know that you are his friend. Be kind, but firm, and always make the bull keep his place. Never take any chances, by getting careless, and never fight a bull unless you want trouble.

Poultry prefer light houses. Be careful of your feed with all stock. Drainage is a necessary foundation for a good road. Gapes can be cured by fumigating the chicken with sulphur. Select your cockerels to overcome the shortcomings of your hens. Baked potatoes occasionally fed to the chicks are relished by them. Butter fat seems to absorb more moisture when comparatively warm. Many growers think there is more money in raspberries than strawberries. Sunshine is a great purifier; allow it free access in the barn whenever possible. Milk is very susceptible to filth and disease, and care must be exercised in handling it. The cow that does not yield a profit at the pail eats just about as much as the cow that does. Don't plant any flowers in straight rows except hollyhocks or sunflowers or plants for borders. The one cry against the general practice of dairy farming is that it requires too much labor. The well ventilated barn will be more comfortable the coldest day than one poorly ventilated. Twenty acres of corn put into the silo is worth more in feeding a dairy herd than 30 acres in the crib. Don't forget about the lice these days, when the hens are shut up a good part of the day and night. There is a best temperature for each individual lot of cream, but this can be determined only by experience. If the man who has no silo would watch his neighbor feed and watch the results he would soon have one. Do not neglect to use these days when the ground is frozen hard to dress the land liberally with manure. A hill of potatoes stripped by bugs, or on which the leaves are injured by blight, cannot give a satisfactory yield. Whitewashing or painting the interior of the cow stable is advisable and does not bring a burden upon the dairyman. Place no reliance in the theory that birds contaminate by simply seeing a different variety on the other side of the fence. Unless the dairy farmer really knows a good dairy cow when he sees one, he should not attempt to build up a dairy herd. There is a tradition that cows will do better in warm weather than in cold weather, but experience has disproved this fact. The best way to feed straw to horses and mules at work is to reduce it to chaff and mix it with mid-dlings and corn chop. No animal suffers more readily from intense cold in the winter than more severely from intense heat in the summer than the hog. Get ahead of the season in all garden work. By and by the rush of other things will come and a part of this work may be neglected. Plant strawberries as soon as the season will allow. Next year's crop depends upon the start made this season, so strawberry growers say. To seed down a vegetable garden after the earth has been worked, firmed and raked thoroughly, the first needful thing is to level the ground. The time will soon be here when we shall need seed corn for planting. It is always well to make a selection and have all things ready before planting time. The cow freshening in the spring will produce a maximum flow of milk during the first couple of spring months because of the ideal conditions of the pastures. If perches, houses and coops are thoroughly treated now with a good mite destroyer there will be no danger of their making any further trouble until next summer. Stables should be cleaned carefully daily, and disinfected thoroughly at least twice during the winter season, and always after a case of disease among the animals in the stable. Before commencing to fatten, chickens should be thoroughly dusted with insect powder, and this should be repeated at least twice during the feeding period to keep them free from vermin. Set out a few flowers and fruit plants each year, and soon you will have an abundance. Many people never have any yard and garden worth speaking of because they always neglect to order and set out plants in season, always fully believing that they will not forget it the next year. A good motto in gardening is, "Do it now." Alfalfa makes the hens cackle and the turkeys gobble. It induces the pigs to squeal and grunt with satisfaction. It causes the contented cow to give pails full of creamy milk and the shepherd and whitetailed steers to howl for the feed rack. Alfalfa softens the disposition of the colt and hardens his bones and muscles. It fattens lambs as no other feed and promotes a wool clip that is a veritable golden fleece. Don't forget the machinery, the tools and implements that may need a little tinkering with here and there, to be put into good working order, so that they may be ready at the first call of the new season and not cause you delay. Alfalfa softens the disposition of the colt and hardens his bones and muscles. It fattens lambs as no other feed and promotes a wool clip that is a veritable golden fleece.

Don't forget the machinery, the tools and implements that may need a little tinkering with here and there, to be put into good working order, so that they may be ready at the first call of the new season and not cause you delay.

It is advisable to gain the bull's confidence and let him know that you are his friend. Be kind, but firm, and always make the bull keep his place. Never take any chances, by getting careless, and never fight a bull unless you want trouble.

Alfalfa makes the hens cackle and the turkeys gobble. It induces the pigs to squeal and grunt with satisfaction. It causes the contented cow to give pails full of creamy milk and the shepherd and whitetailed steers to howl for the feed rack. ## WAS JUST COPYING MAMMA

Child's Actions That at First Mystified Father Were Easily Explained.

The little six-year-old daughter of a well-known club woman was found in her play room the other day doing all kinds of acrobatic stunts and gesticulating wildly and weirdly.

"What are you doing?" asked the child's father.

"I'm playing 'I'm mamma,'" she answered. Then she made more unique movements with her little arms and said: "There, father, you accept them. That's what they do when mamma makes them."

"What shall I accept?" asked the father, still more mystified, "and what does mamma make?" Tell me what you are doing."

"Why," she said, "I am playing that I am mamma at her club. Whenever mamma goes to her club she makes motions, and the others accept them. I heard her say so over the telephone to Mrs. Smith this morning."—Illustrated Magazine.

The weird happenings, the strange characters, the spiritual seances vividly described in that successful novel "The House of a Thousand Candles," are even more bewildering in the dramatization that has created a furore in theatrical circles. On its production at Daly's Theatre on Monday evening the play will be elaborately staged and excellently enacted. "The House of a Thousand Candles" is one of the few attractions that has scored an immediate success. This is due to the novelty of its story that is so decidedly different from anything heretofore given the stage. The four acts of the play are staged with special scenery.

**IT IS TRUE**  
Many people hesitate about coming to the bank with a small deposit. Some have an impression that to have a bank account necessitates a large amount of money.  
We admit that A LARGE BANK ACCOUNT is a very satisfactory thing to have, and many of our Savings Accounts have grown to a considerable size. Most of them however, started with a small amount, and we invite you to do likewise. Money in the bank gives you "that independent feeling."  
Deposits made on or before March 13th draw interest from March 1st.
